

# Photo + Video Tips

At the end of TGP, we love to share all the photos + videos from across all our locations nationwide!

## Get Great Shots!

The video and photos you take are really, **really important!** The event may only last a few hours, but your shots will live on long afterward on your location page.

- **Focus on the action.** Capture people hugging, dancing, cheering, and (most importantly) walking! Food trays, birds, and people filling out paperwork gets boring - fast.
- **Change angles.** Flat on the ground, high above, through a tree - be adventurous! Don't just camp out in one place, try angles of people walking from behind, the side, or towards you wearing TGP swag.
- **Big smiles.** Prompt people to cheer or say cheese - they'll look better, and thank you later!
- **Get up close.** A few scenic shots can be nice, but don't hang back and fill your camera with far-away photos and video - people are what's important.
- **Good equipment.** Phones have come a long way, but DSLR cameras still capture the best images. If you are shooting video, you may want to consider a stabilizer (for smoothness) and microphone (for crisp audio) as well.

### how to submit photos

1. Send your photos right to your location's Event Director.
2. Your Event Director can then upload their photos directly to the location page through WAVES.

**(WeTransfer is a great way to send a lot of photos at once)**

## Photo Guidelines

Quickly! So everyone can appreciate + share.

High quality. Please don't resize/recompress!

No watermarks/text. We'd love to credit you! Send your name + site!

Filtered. We'd be grateful if you can remove duplicate or blurry photos.
